

Eawag Seminar Invitation

Global Water Risks and Responses

Speaker **Prof Jim W Hall**
Environmental Change Institute, University of Oxford, UK

When **April 29, 11.00 – 12.00 a.m.**

Where **Forum Chriesbach C20, Eawag Dübendorf**

Abstract Professor Hall's talk will present risk-based concepts for defining and operationalising water security. The global state of water security will be reviewed, focussing upon risks of water scarcity, flooding, water supply and sanitation and environmental degradation. Experiences of responding to these risks in a variety of settings world-wide will be reviewed and generic principles for navigating pathways towards water security will be presented. The presentation will draw upon analysis presented in the report *Securing Water, Sustaining Growth* which was launched at the World Water Forum in 2015.
