

## ECHA Workshop in Helsinki

June 16, 2023 |

**It was a great and a much welcomed idea by ECHA to organize the discussion platform on alternatives to animal testing for human and environmental health assessment from May 31 - June 1st, 2023, making sure that representatives of all stakeholder groups were involved.**

Kristin Schirmer was invited to present about current status and next steps towards alternatives to chronic fish toxicity assessments, the only talk fully dedicated to environmental health.
