

Janet Hering elected for US Academy of Engineering

February 6, 2015 | Andri Bryner

Topics: Organisation & Staff

The National Academy of Engineering (NAE) has elected 67 new members and 12 foreign members, announced NAE President Dan Mote Jr. Thursday, February 5th. This brings the total U.S. membership to 2263 and the number of foreign members to 221. Among the new elected members is also Eawag director, Prof Janet Hering.

Election to the National Academy of Engineering is among the highest professional distinctions accorded to an engineer. Academy membership honours those who have made outstanding contributions to "engineering research, practice, or education, including, where appropriate, significant contributions to the engineering literature," and to the "pioneering of new and developing fields of technology, making major advancements in traditional fields of engineering, or developing/implementing innovative approaches to engineering education."

On the NAE [list of the newly elected members](#) Janet Hering is mentioned "For contributions to understanding and practice of removal of inorganic contaminants from drinking water."
