UMANYOLO OTHOLAKALA KUMCHAMO

UMANYOLO OTHOLAKALA KUMCHAMO

Umchamo womuntu uqukethe imisoco eminingi ebalulekile.

Lemisoco ingumanyolo omuhle kakhulu.

Ukuthola lemisoco, uMkhandlu weTheku weZamanzi nokuThuthwa kwendle uqoqa umchamo kumathoyilethi angu Mahlukanisa endaweni.

UBUCHWEPHESHE OBUSHA

BOKUTHOLA LEMISOCO

Kumchamo oqoqiwe, Abacwaningi sebengahlola ngobuchwepheshe obusha ukuthola lemisoco ezokwenza umkhiqizo kamanyolo.

Lomkhiqizo kamanyolo ungasetshenziswa kwezolimo endaweni.

KWENZAKALANI NGOMCHAMO

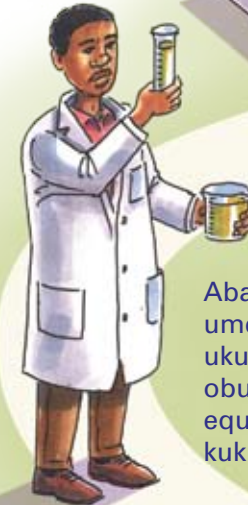

Umchamo othathwa kwithoyilethi uMahlukanisa uqoqa ufakwe ethangini elincane elincike kwisakhiwo sethoyilethi.

Umchamo ube usuthuthwa ukusuka ethoyilethi lakho uyiswe endaweni lapho ugcinwa khona.

Umchamo ugcinwa ethangini elikhulu endaweni okubekwa khona ithangi.

Abacwaningi basebenzisa umchamo ogciniwe ukuhlola ubuchwepheshe obusha bokuthatha imisoco equkethwe umchamo bese kukhiqizwa umanyolo.

Umanyolo okhiqiziwe ungasetshenziswa kwezolimo endaweni ukwenza ngcono ukukhula kwezitshalo.
