

D2.3 Household Survey on Environmental Sanitation

The questionnaire below was prepared for a household survey conducted in September 2009 within the Household-Centred Environmental Sanitation (HCES) project in Darkhan, Mongolia. This project is being implemented as a component of the Water Research Project “MoMo – Integrated Water Resources Management for Central Asia: Model Region Mongolia”, which is funded by the German Federal Ministry of Education and Research (BMBF). The goal of the household survey was to assess the current status, practices and perceptions of the environmental sanitation situation in a peri-urban sub-district in Darkhan.
