

# 7<sup>th</sup> Eawag Summer School in Environmental Systems Analysis 2015

## - Recommended Literature

05.02.2015/PR/CA/AS/DK

The course will provide an introduction to and practice in model-based data analysis. Major topics will be sensitivity analysis, identifiability analysis, and frequentist and Bayesian inference. Emphasis will be on Bayesian techniques. The exercises will be done using the freely available software environment for statistical computing and graphics R (<http://www.r-project.org>).

As the course will be very intensive, we strongly recommend some preparatory reading in sensitivity analysis, identifiability analysis, frequentist and Bayesian statistics, and some familiarization with R. In the following we provide some links to short introductory material on the web that would be suitable for this purpose and a list of papers and books that go into more depth.

### Sensitivity Analysis

#### *Links to introductory texts:*

Overview of sensitivity analysis: [http://en.wikipedia.org/wiki/Sensitivity\\_analysis](http://en.wikipedia.org/wiki/Sensitivity_analysis)

#### *Books:*

Saltelli, A., Chan, K., and Scott, E. M., eds (2000) *Sensitivity Analysis*. John Wiley & Sons, Chichester, England.

Saltelli, A., Tarantola, S., Campolongo, F., and Ratto, M., eds (2004) *Sensitivity Analysis in Practice - A Guide to Assessing Scientific Models*. John Wiley & Sons, Chichester, England.

Saltelli, A., Ratto, M., Andres, T., Campolongo, F., Cariboni, J., Gatelli, D., Saisana, M., and Tarantola, S., eds (2008) *Global Sensitivity Analysis - The Primer*. John Wiley & Sons, Chichester, England.

### Identifiability Analysis

#### *Links to introductory texts:*

Definition of identifiability: <http://en.wikipedia.org/wiki/Identifiability>

#### *Papers:*

Brun, R., Reichert, P. and Künsch, H.R. (2001) Practical identifiability analysis of large environmental simulation models, *Water Resources Research* 37(4), 1015-1030.

Renard, B., D. Kavetski, G. Kuczera, M. A. Thyre, and S. W. Franks (2010) Understanding predictive uncertainty in hydrologic modeling: The challenge of identifying input and structural errors, *Water Resources Research*, 46, W05521, doi:10.1029/2009WR008328.

### Frequentist Statistics

#### *Links to introductory texts:*

Frequentist interpretation of probabilities: [http://en.wikipedia.org/wiki/Frequency\\_probability](http://en.wikipedia.org/wiki/Frequency_probability)

Frequentist inference: [http://en.wikipedia.org/wiki/Statistical\\_hypothesis\\_testing](http://en.wikipedia.org/wiki/Statistical_hypothesis_testing)

Frequentist confidence intervals: [http://en.wikipedia.org/wiki/Confidence\\_interval](http://en.wikipedia.org/wiki/Confidence_interval)

#### *Books:*

##### *Regression analysis:*

Seber, G. A. F. and Wild, C. J. (1989) *Nonlinear Regression*. Wiley, New York.

Bates, D. M. and Watts, D. G. (1988) *Nonlinear Regression Analysis and its Applications*. Wiley & Sons, NY.

Rawlings, J.O., Pantula, S.G. and Dickey, D.A. (1998) *Applied Regression Analysis – A Research Tool*. Springer

Hill, M.C. and Tiedeman, C.R. (2007) *Effective Groundwater Model Calibration: With Analysis of Data, Sensitivities, Predictions, and Uncertainty*, Wiley.

##### *Numerics:*

Nocedal, J. and Wright, S. J. (2006) *Numerical Optimization*. Springer, 2<sup>nd</sup> edition.

### Bayesian Statistics

#### *Links to introductory texts:*

Bayesian interpretation of probabilities: [http://en.wikipedia.org/wiki/Bayesian\\_probability](http://en.wikipedia.org/wiki/Bayesian_probability)

Bayesian inference: [http://en.wikipedia.org/wiki/Bayesian\\_inference](http://en.wikipedia.org/wiki/Bayesian_inference)

Markov chain Monte Carlo techniques: [http://en.wikipedia.org/wiki/Markov\\_chain\\_Monte\\_Carlo](http://en.wikipedia.org/wiki/Markov_chain_Monte_Carlo)

#### *Books:*

##### *Concept-oriented texts:*

Gelman, A., Carlin, J.B., Stern, H.S. and Rubin, D.B. (1995) *Bayesian Data Analysis*, Chapman & Hall.
