

Seminar Invitation

Microbial versatility in dark ocean “autotrophs”

Speaker **Alyson Santoro, PhD, Assistant Professor, UCSB**

When **May 11, 2021, 16.00 - 17.00**

Where Online via Zoom, contact admin.umik@eawag.ch for access details

Abstract Textbooks often place microbes neatly into categories based on their metabolism. In reality, microbial metabolism is messy and many organisms blur these tidy definitions. I will discuss recent examples from our research and the impacts that these hybrid metabolisms may have on the cycles of carbon, nitrogen, and oxygen in the dark ocean.
