

23rd Swiss Global Change Day

Bern • 19 April 2023

#SGCD23

Conference, Workshop and Poster session with awards

Join the marketplace

Present your research: Poster session and awards

In addition to the extensive programme, plenty of time is provided to present your own research or organisation with a poster or at a stand and to network with colleagues.

Are you a student or postdoc? Enter the poster competition.

Posters from students or postdocs in the research area of global change will be awarded by a jury: The winners will be honoured with a travel award of 1000 francs each, which allows them to attend an international conference in the current year. The poster awards are sponsored by ACP, SAGW and ProClim.

Terms and Conditions to enter the contest

Posters must be submitted as a PDF file by e-mail by **10 April 2023**. Former winners may no enter the contest. For the detailed Terms and Conditions and further information check our event website: proclim.ch/id/JZdw

Posters can be submitted in the following categories:

Geosphere • Biosphere

Atmosphere • Hydrosphere

Human Dimensions • Sustainability

Scientific Organisations

Would you like to present your organisation and its work with a poster or/and a stand? Get in touch with us directly: proclim@scnat.ch

Get the experience: Workshop for young researchers

'Debunking Fake News and Confidently Dealing with Scientific Uncertainty'

This one-hour workshop for young researchers is based on the sad truth that fake news and SCAM-attacks (Scientific Certainty Argumentation Method) are established means of undermining the reception of scientific results that should lead to political change. Climate research is not the only field where this is happening but many of the insights on the topic were gained here.

The workshop first gives hints for interactions with journalists to portray uncertainty as a strength rather than a weakness of scientific research. The second topic is the debunking of fake news. The workshop presents a standard method that is preferable to 'naïve' debunking and offers a short online exercise in how to use that standard method.

The workshop is held by Christopher Schrader, science journalist with 30 years of experience and author of the German language handbook on climate communication 'Über Klima sprechen', published by Klimafakten.de and Oekom. Schrader lives in Hamburg, Germany and will attend online.

Please let us know with your registration if you would like to attend this workshop. The number of participants is limited.

First come, first served: The places will be allocated to students and postdocs according to the date of registration and payment.

Programme

8.30 Coffee • Preparation of posters

9.00 Introduction

KARIN INGOLD, President of ProClim

9.10 Climate communication beyond promoting problem awareness – improving the relationship between science, politics and society

HANNAH SCHMID-PETRI, University of Passau, Germany

9.45 How to reach net zero: Real-world labs as a platform for transformative science at the interface between research and practice

MICHAEL STAUFFACHER, ETH Zurich

10.20 Coffee break • Posters

11.10 Nature-Based Solutions: an illusion or a key strategy to tackle climate change?

EDOUARD DAVIN, Wyss Academy for Nature, University of Bern

11.45 Lunch • Posters • Workshop

Workshop for young researchers

12.00–13.00 Debunking Fake News and Confidently Dealing with Scientific Uncertainty

CHRISTOPHER SCHRADER, Science Journalist

13.45 Surprise

14.15 Swiss water resources under pressure – what challenges do we face?

BETTINA SCHAEFLI, University of Bern

14.50 Differential seasonal shifts: climate change leads to ecological relationship problems

MARCEL VISSER, The Netherlands Institute of Ecology, Wageningen

15.25 Coffee break • Posters

15.50 The health, environmental, and economic implications of changes towards sustainable diets

MARCO SPRINGMANN, University of Oxford, United Kingdom

16.25 Poster awards

16.40 Closure

16.50 Apéro

Registration and further information:

proclim.ch/id/JZzdw

The Swiss Global Change Day is the annual event organised by ProClim to look beyond the horizon of climate and global change research with well-known experts, covering a broad range of topics. Benefit from this 'marketplace' event: Plenty of time is provided to present your own research or organisation with a poster or at a stand and to network with colleagues. The most attractive and comprehensive posters submitted by students or postdocs will be honoured with a travel award of 1000 francs.

Location

Freies Gymnasium Bern · Beaulieustrasse 55 · 3012 Bern

Please take bus no. 11 direction 'Neufeld P+R', get off at the 5th stop 'Brückfeld'. The trip takes about 15 minutes from the main station.

Organisation

Swiss Academy of Sciences (SCNAT)
